

TITLE OF POSTER

Author names and affiliations (underline the name of presenting author)

MOTIVATION AND PROBLEM STATEMENT

Description with a Picture/Table/Chart, as required

RESULTS AND DISCUSSION

Using Chart(s)/Flowsheet(s)/Picture(s) of the Main Findings of the Study  
Use of bulleted points, avoiding the detailed explanation, is recommended.

METHODOLOGY

Methodology Followed.  
Use Chart(s)/Flowsheet(s)/Picture(s) of Experimental Setup/Simulation Framework.  
Use of Text Sparingly.

SUMMARY AND FUTURE OUTLOOK

Key Points in Bullet Points

References:  
1. Books (in any standard format)  
2. Journal articles, etc. (in any standard format)  
----maximum 4 references----

Funding for the work may be acknowledged in this space

# Instructions for poster presentation

- **Do not simply transfer your manuscript onto the poster.** The conference explicitly limits the amount of text.
- Aim for **short paragraphs, bullet points, figures and visual summaries.**
- Every figure/table should stand on its own with a clear **caption.**
- Every graph needs properly labelled **X and Y axes**, including units where applicable.
- Keep tables simple. **Four columns or fewer** is preferred.
- Use colour strategically rather than decorating the entire poster.
- Make sure someone standing several feet away can immediately identify the **title, objective, major result and conclusion.**
- Since the poster is approximately **A0 portrait**, the layout should be designed for that physical size rather than creating a smaller document and enlarging it later.
